Technical requirement

1. The crane shall be designed, manufactured, installed, inspected and accepted according to GB/T19683
2. The whole power circuit and operation circuit of the crane shall be connected to all lines of electrical equipment when measuring its insulation resistance to ground and phase to phase resistance, with the value not less than 0.5M. The insulation resistance can be reduced by 50% in humid areas
3. The shell of all electrical equipment of the crane shall be grounded, crane track is allowed to be used, and the metal structure of the plant is grounding conductor
